

Session for 0 to 3-Year-Olds

When young children are learning language, story-based activities help them grasp the meaning of sentences and spatial vocabulary (such as "Are the Easter eggs hidden in the petals?"). As they step over, crawl, or squat to find eggs, they enhance their posture transitions. This festive Easter setting not only lets children share the joy with family and friends but also fosters essential communication and cooperation skills.

Objectives

1. Enhance children's observation and visual search skills through Easter egg hunts.
2. Step over obstacles or bend to find eggs, improving posture flexibility.
3. Ride a rocking rabbit to stimulate the vestibular system and build core strength.
